What seems like talent often comes down to a difference in focus.

Short-term intensity cannot replace long-term commitment.

A mature engineer must make reasonable estimates despite uncertainty.

To get things done you have to do things you are not interested in.

A professional works professionally.

To be considered a senior, you must be seen as one.

You do not sell your time.
You sell yourself.
Everyday.

Time and energy are scarce resources.

Hard work always beats talent if talent doesn't work hard.

Value is created by doing.

Discipline is cheaper than regret.

Consistency heads excellence.

You don't need more time.
You need more focus.

Programming is fun, but shipping is your job.

Back to the basics:
1. Do your job.
2. Make reports.
3. Be practical.

First, solve the problem.
Then, write code.

Do that brag document.
